

Digital Video Recording System

Digital Camera multiplexer ● 30 Day Camera Recorder ● Remote Camera Viewer

Introducing The D.V.R.S, the Very Latest in CCTV technology, incorporating the power and versatility of a P.C. The D.V.R.S uses Digital recording technology, allowing the user unparalleled control over the entire recording and viewing process and the ability to remotely View up to 16 cameras from any Windows Pc with a Modem.

View Live, or playback is available in: Full screen, Quad (4) screen, 8 screen and 16 screen. **Dial** in from any other Windows Pc, and View Live Full or Multi-screen Images, Via ISDN, PTN, LAN 56K Modem or over the Internet, the choice really is yours

Digital recording direct to Hard Drive, Time Lapse and Video Motion Detection, Playback with Time and Date search, or camera number.

Video Motion Detection

Saves Hard drive space and recording time, by only recording detected movement within a specific area of the camera images (The Green Box), works on all cameras at the same time.

Time Lapse

As with standard Time Lapse Vcrs will record constantly all cameras at the same time, for up to 30 days.

The DVRS uses a intuitive user interface, for ease of operation, and the Client Software which can be installed on to any Windows PC uses the same interface

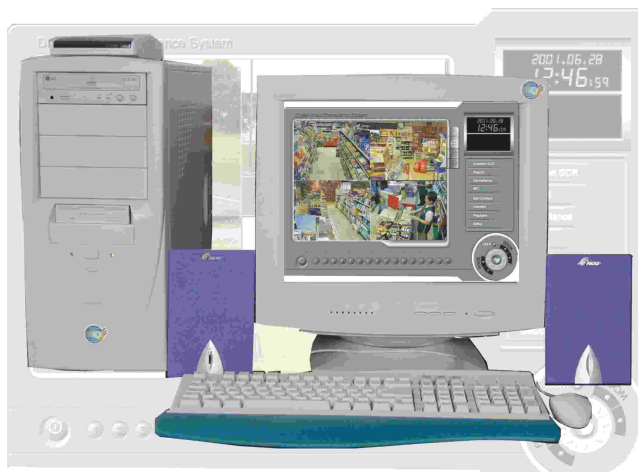

Time and Date, Simple Camera Selection

Pan/ Tilt and Zoom Controls for Compatible Cameras

The D.V.R.S System, Comes fitted in a Power PC, pre-loaded with all the Software needed, a massive Hard Drive for storing over 30 Days of Digital Quality Video, a 8X CD writer for distribution of images and Video, a fast Processor and Plenty of Memory.
